Disclaimer

This short course on Air Quality Forecasting was prepared as a result of work sponsored, and paid for, in whole or in part, by the U.S. Environmental Protection Agency (EPA). The opinions, findings, conclusions, and recommendations are those of the authors and do not necessarily represent the views of the EPA. The EPA, its officers, employees, contractors, and subcontractors make no warranty, expressed or implied, and assume no legal liability for the information in this course. The EPA has not approved or disapproved the content, nor has the EPA passed judgment upon its accuracy.

The mention of commercial products, their source, or their use in connection with material reported herein is not to be construed as actual or implied endorsement of such products.

Preface

This course should be viewed as an initial training in air quality forecasting. As more data become available, analyses performed, reports reviewed, etc., the course may be expanded and enhanced. The EPA welcomes participants' comments and suggestions and any example analyses, new databases, or additional references that might enhance the course. Participants should keep in mind that this course provides basic knowledge to begin forecasting for the Air Quality Index (AQI) and describes methods to improve existing forecasting programs; it is not meant to show the only way to forecast air quality.

Acknowledgments

The instructors of this course, *Timothy Dye, Clinton MacDonald, Joe Cassmassi, Mike Gilroy, William Ryan, and Lewis Weinstock,* thank the many people who have contributed comments, ideas, and examples to this course: Richard (Chet) Wayland, John E. White, Pat Dolwick, Hilary Hafner, and Paul Roberts.
